### **COVID-19 EMERGENCY SUPPORT TO MEMBERS OF THE OVIE BRUME FOUNDATION YOUTH CENTRE, LAGOS**

#### **INTRODUCTION**

The economic uncertainties, and disruptions that have resulted from the coronavirus (COVID-19) pandemic come at a significant cost to the global economy, in addition to its immediate impact on health outcomes and, tragically, on lives. During the first few months of the outbreak, the government focused on managing the spread of the disease through stringent transmission control measures. The lock-down led to the suspension of all forms of work for weeks hence, vulnerable and low-income families faced the risk of penury, starvation, and deprivation. With very little or no savings and poor social security, families were having fewer meals, borrowing money, and defying the safety guidelines and threat of police in order to go out and work.

Against this background, the Ovie Brume Foundation with support from the AIDS Healthcare Foundation (AHF) COVID-19 Emergency Support Fund provided food relief materials to One Hundred and forty (140) families and sanitary towels to two hundred (200) girls within the poor communities in Eti-Osa LGA, whose children are members/beneficiaries of the Foundations' Youth Center.

#### **REPORT**

In line with the set objectives of the project, members of the Foundation were contacted and evaluation conducted to ensure that the most vulnerable families and girls were prioritized to receive the palliatives. This exercise was carried out on the 6<sup>th</sup> and 7<sup>th</sup> of May. A list of 120 families and 200 adolescent girls were collated and were grouped into two batches. This was done to ensure that beneficiaries would be able to get the Foundations' office within the hours allowed by the government and to avoid crowding thus observing the rule of social and physical distancing. The palliative package consist of 12.5Kg of Rice and Beans, 2 liter of cooking oil, 1 cartoon of 70g Indomie Instant Noodles, 12 satchets of 70g Tomatoo puree and 7 face masks. Regular and Heavy flow sanitary towels that contains a range of 12-16 pads to last them for a maximum of 2 cycles.

Palliatives were distributed on the 12th and 13th of May between the hours of 10 am and 2 pm. 60 families and 100 girls picked up their relief and sanitary packages on each day. Families were grateful and full of praises for the Foundation. Below are some of the comments of beneficiaries:

### **CHALLENGES**

Some of the other families that were not enlisted but heard about the project felt left out. The Foundation was able to support additional 31 families and 3 girls for the sanitary pads while others were shortlisted to another opportunity. **Also many of those beneficiaries had no funds to return home and the Foundation had to provide them funds.**

### **CONCLUSION**

There are no known foods or dietary supplements that can prevent COVID-19 infection, however, maintaining a healthy diet is an important part of supporting a strong immune system. It is important that interventions that ensure survival is paramount, it is imperative that basic essentials that promote human dignity are not overlooked. The provision of food items and female hygiene products is necessary for families of our beneficiaries and their neighbouring communities.
